Owners of property included within areas zoned for agricultural use or adjacent to such areas should expect that they will be subject to conditions arising from such agricultural operations. Conditions may include, but are not limited to exposure to: noise, lights; fumes; dust; smoke; insects; chemicals; machinery operations, including aircraft during any hour of day or night; storage and land application of manure; and application by spraying or other means chemical pesticides, fertilizers and other soil amendments. The conditions described may occur as a result of any agricultural operation which is in conformance with accepted customs, standards, laws and regulations. Residents in and adjacent to agricultural areas must accept such conditions as a normal and necessary aspect of living in an area with a strong rural character and an active agricultural sector. Oconto County has established the Land Conservation Department to assist in the resolution of any animal waste management disputes, which might arise between residents of the county regarding agricultural operations.

- (2) A livestock operation shall have no unconfined manure piles in a water quality management area.
 - (3) A livestock operation shall have no direct runoff from a feedlot or stored manure in to the waters of the state.
 - (4) A livestock operation may not allow unlimited access by livestock to water of the state in a location where high concentrations of animals prevent the maintenance of adequate sod or self-sustaining vegetative cover.
- (g) Enforce the Agriculture performance standards as outlined in NR 151.02, NR 151.03, NR 151.05, NR 151.055, NR 151.06 and NR 151.07 Wisconsin Adm. Code for:
